

One Sith

"How can you all be Sith? We were taught there were never more than two, a Master and an apprentice."

"You were taught the old ways. We are only one Sith now."

—[Alema Rar](#), and [White Eyes](#)

The **One Sith**, or the **New Sith Order**, was a [Sith cult](#) founded by [Darth Krayt](#) at some point before [30 ABY](#) on [Korriban](#), the ancient [Sith burial world](#). Conducting itself according to Krayt's [Rule of One](#), this new Sith cult was heavily-organized and bureaucratized in contrast to the earlier two-member [Order of the Sith Lords](#) or the infighting of the ancient [Sith Empire](#). Most of the followers were trained from birth and were inculcated with a sense of absolute loyalty to the order, sported a red-and-black [tattooed](#) appearance, and carried [lightsabers](#) with a [yorik coral](#)-styled hilt design.

This Sith order was considered heretical by the [holocrons](#) of [Darth Andeddu](#) and [Darth Bane](#). By the year [130 ABY](#), the One Sith had risen to take the place of [Lumiya's Sith](#) faction, itself the remnant of [Darth Bane's Order](#), dominating [the galaxy](#) through an alliance with the [Fel Empire](#). Krayt ultimately turned on the [Fel dynasty](#) and seized control of the galaxy as his [own domain](#).

History [Edit](#)

The rise of Darth Krayt [Edit](#)

"Don't look so amazed. The Sith were always born and re-born within the ranks of the Jedi."

—Darth Krayt to Cade Skywalker

Prior to his death, the coming of an entity known as "the One Sith" was foreseen by [Darth Tenebrous](#), whose predictions nonetheless match the ascent of [Darth Sidious](#), his [own apprentice's apprentice](#), more than they do the coming of [Krayt's One Sith](#), although this was a direct reference to Sidious.^[2]

Darth Krayt, formerly the [Jedi Master](#) A'Sharad Hett, was the founder and leader of this new generation of Sith Lords. A witness to a [galaxy](#) deeply wounded by the [Clone Wars](#), the [Galactic Civil War](#), and the [Yuuzhan Vong War](#), A'Sharad came to believe that the galaxy was fractured and weak, and that a single will was needed to make it whole and strong again. Equipped with [knowledge](#) gained from [Sith holocrons](#) found on the ancient Sith burial world of [Korriban](#) and renaming himself [Darth Krayt](#) after the fierce [creature](#) of his [homeworld](#), he reestablished the Sith Order under his leadership, thus

claiming the title **Dark Lord of the Sith**. Krayt's Sith differed significantly from **Darth Bane's Order of the Sith Lords** in that he decided that his nascent Order should not be limited by the ancient **Rule of Two**. Instead, he introduced the **Rule of One**—a new system in which many lesser Sith served under the will of the Dark Lord. He believed that the Sith needed to grow in strength over the decades, while the **Jedi Order** would become increasingly weakened and compromised by their lack of ruthlessness. As such, the One Sith kept their existence a secret, even while **Darth Caedus** launched his war against the **Jedi**. When the balance of power had shifted sufficiently, Krayt and his Order would execute their agenda to restore the absolute rule of the Sith to the galaxy.

Date dissolved **139 ABY**^[1]

Darth Wyyrlok (I) confers with Darth Krayt in his stasis chamber.

Krayt's Order was founded at some point before **30 ABY**. Its agents, including **Lomi Plo** and **Welk**, were active during the Yuuzhan Vong War, and by **40 ABY**, they numbered more than thirty. The new Sith were not connected with **Lumiya** and her plans to remake Jacen Solo into a **Sith Lord**, which culminated in the former **Jedi Knight's** ascension as Darth Caedus in 40 ABY. Although Krayt's claim to the title of Dark Lord was contested by Caedus—unwittingly, as Caedus remained unaware of the One Sith's existence—the One Sith remained in hiding and did nothing to interfere with **Caedus' Sith Order** or his war against the Jedi.

The existence of two separate Sith Orders had arisen due to Krayt's philosophical differences with those others who wished to ensure the continuation of the Sith. **Vergere**, a failed Sith apprentice of Darth Sidious, encountered Hett in **Yuuzhan Vong** captivity prior

to the Yuuzhan Vong War, and had philosophical discussions with him, ultimately leaving him behind as they did not see eye to eye on certain matters. Lumiya, a former pupil of **Darth Vader**, apparently encountered him some time during the early years of the Yuuzhan Vong War, but opted to actively reject his vision for the Sith. Lumiya and Vergere were both unwilling to discard the Rule of Two and thus were not compatible with Krayt's Order. According to the Sith on Korriban in 40 ABY, it was believed that **Luke Skywalker's** Jedi Order would also grow in strength with time, frustrating the new Sith Order's long-term plan. They therefore took advantage of Solo's fall to the **dark side** in order to pre-empt the Jedi, effectively using him to deflect attention away from themselves.

In **41 ABY**, Darth Caedus perished at the end of the **Second Galactic Civil War** and his apprentice, **Tahiri Veila** found redemption in the **light side**. Without Caedus or Tahiri to preserve **Lumiya's Sith Order**, the last surviving remnant of the Order of the Sith Lords was dissolved, thus eliminating Darth Bane's millennium-long legacy. Once again, the Jedi presumed that the Sith were extinct, while the galaxy at large had virtually no knowledge of the One Sith that had been hiding on Korriban since 30 ABY.

Observing the Galaxy Edit

"I recognize your face. You've been watching the fight on Coruscant."

"And that surprises you? What happens on Coruscant shapes the fate of the entire Galaxy. Of course we are watching. We are always watching."

—Luke Skywalker and Darth Krayt

A few months after the end of the Civil War, Darth Krayt experienced a **vision** regarding a **frozen moon**. His lieutenant **Wyyrlok** assigned the **Anzat assassin Kell Douro** to **Fhost** to discover the truth hidden behind the vision. When Kell Douro inquired to Wyyrlok about why the One Sith did not investigate the vision themselves, Wyyrlok responded by telling him that

Krayt still wanted the Sith to remain quiescent. Later Wyyrlok sent two more agents, the [Umbaran Nyss Nenn](#) and his sister [Syll Nenn](#), to track the Jedi [Jaden Korr](#) for use in a plot to infiltrate the New Jedi Order but apparently the plan failed.

In [44 ABY](#), when Jedi [Grand Master](#) Luke Skywalker, Jedi Knight [Ben Skywalker](#), and Sith apprentice [Vestara Khai](#) came to Korriban during the [Lost Tribe of Sith emergence](#), the One Sith were not detected by the trio and the Order continued on in secret, continuing to grow and strengthened undetected. However, Krayt was later forced to expose the One Sith's existence when forging a temporary alliance with Luke Skywalker [to defeat Abeloth](#) in the realm of [beyond shadows](#). Although Skywalker saw the truth through his lies about being part of the [Lost Tribe of the Sith](#), Krayt preserved the mystery of his identity as well as the location and the motivations of his Sith Order.

For more than a hundred years, Krayt grew and strengthened the Sith on Korriban, surreptitiously planning to bring its vision of peace and order to the galaxy. While the order grew in secret, Krayt attempted to heal the wounds inflicted upon him by the Vong, going into lengthy [stasis](#)-treatments and conferring only with his most trusted servant, the first Darth Wyyrlok.^[3]

The Sith–Imperial War [Edit](#)

"Lingering hatred festered on worlds that had suffered heavily at the hands of the Yuuzhan Vong. That hatred gave us our opening. We manufactured a cause for war, making the Vong seem responsible. Split, the Galactic Alliance began to fight itself. And so died."

—Darth Krayt

At last, in the period of [127–130 ABY](#), the Sith made their presence known openly under Krayt's leadership, and the result of his machinations was the [Sith–Imperial War](#). [Krayt's own holocron](#) contained entries relating how he caused the fall of the [Galactic Alliance](#) and the restoration of the [Empire](#) as the dominant galactic power.

Knowing that many worlds still harbored intense hatred and distrust towards the Yuuzhan Vong, Krayt's agents sabotaged the [Ossus Project](#), a Jedi-backed plan to use Yuuzhan Vong [terraforming](#) techniques to restore a barren section of the once-devastated Jedi fortress world of [Ossus](#). When the test proved successful, the response was tremendous. Out of a host of applicants, one hundred worlds were selected for the Vong terraforming process. Yuuzhan Vong [Shapers](#), overseen by Jedi escorts, produced incredible results. Thanks to the One Sith's sabotage, however, the ecosystems soon deteriorated; vegetation withered, and bony growths like those once seen on those the Vong had taken as slaves began forming on the skin of the inhabitants. The Jedi immediately suspected sabotage, but could never prove it. It did not matter; the lingering resentment the galaxy felt towards the Vong, even decades after their defeat and exile, did Krayt's work for him, and soon the Vong were accused of trying to restart their genocidal crusade against the galaxy by other means.

Darth Krayt alongside Darth Maladi, Darth Nihil, and Darth Wyyrlok.

The results were everything the One Sith could have hoped for. The Jedi, devoted to the truth above all, defended the Vong and encouraged the Galactic Alliance to support them. The Empire reacted accordingly; members of the [Moff Council](#) demanded retribution and, invoking the [Treaty of Anaxes](#), declared war on the Alliance. But in addition to war with the Empire, the Alliance found itself facing dissension from within its own ranks. Worlds that had suffered the most under the Vong now aimed their resentment at the Alliance; many of them refused to support the Alliance and actively sided with the Empire, while others just stood by and watched under the banner of neutrality. So divided, the Alliance was easy to conquer. But [Emperor Roan Fel](#) himself was less than enthusiastic; he'd only reluctantly declared war and never threw his full support

behind it. He even prevented his [Imperial Knights](#) from participating. Because Roan Fel refused to let the Imperial Knights enter the war, the Empire didn't have the strength necessary to counter the Jedi, and so, the Sith joined the conflict.

In three years, the Galactic Alliance was defeated and the Empire absorbed all its former holdings, even reclaiming [Coruscant](#) as the Imperial throneworld. It was a reversal of the galactic order that no one could have foreseen, or believed was possible. But despite the grandeur of this victory, it was but a stepping stone for Krayt.

The consolidation of power [Edit](#)

"Roan Fel never really embraced the war or the idea of a unified galaxy. He went along with it as a political necessity. That's not what the Empire—what the galaxy—needs. The galaxy writhes in chaos and disorder. It requires a man of vision. I am that man of vision. I am the new Emperor."

—Darth Krayt

With the Empire triumphant, it was time to remove the last obstacle to the Sith; their ancient enemies, the Jedi. With the fall of Coruscant, the Empire's ruler, Emperor Roan Fel, had called on the Jedi to surrender and submit to the Empire. But by now, the Jedi were aware of the Sith's involvement in the war and refused to join them. They withdrew from Coruscant, yielding their [Temple](#) to their enemies, and holed themselves in their [praxeum](#) on Ossus. Krayt dispatched his Hand, [Darth Nihl](#), to conduct a devastating attack against the praxeum.

What came to be called the [Massacre at Ossus](#) did not prove to be as absolute a victory as he had hoped for. Although Nihl managed to make several significant kills, especially one of the most prominent members of the Jedi Council, [Kol Skywalker](#) - scion of the very bloodline that had proven to be both the greatest boon and later the greatest impediment to Sith dominance. But the death of even a good number of Jedi did not make for victory. The Jedi were sent to flight, scattered, but they were not yet defeated.

Darth Krayt and his Hand, Darth Talon.

But the Jedi had still been brought low enough to allow him to take the next step; now that the Empire was triumphant, it was time to claim its throne as his own. He launched a daring palace revolution, marching with his cohorts straight into the audience chamber of Emperor Roan Fel himself, killing the man who sat on the throne and seating himself in his place. Noting the confusion and outrage from the members of the Moff Council who were present, he laid out the facts of life for them, that Emperor Fel was never really interested in going to war. Krayt then declared himself Emperor of the galaxy, stating that a man of vision such as himself was required to reinstate intergalactic stability.

Faced with little choice, the Moff Council swore loyalty to him. For the first time in nearly a hundred years since Darth Caedus, a Sith Lord held the galactic seat of power. At once he set about imposing order on a galaxy that sorely needed it, but this too was an incomplete victory. The "Emperor" he had killed had been anything but. It had to be [a double](#), he thought; Fel was a fully trained Imperial Knight and would surely have defended himself, rather than simply and let himself be slain. Krayt made it a priority to find the real Fel, before he recruited allies among the Moffs, the military, or those Jedi who had survived.

And there was a further concern that he kept to himself and his lieutenant [Wyyrlok](#). Krayt knew all too well that his health was failing him; he was ruling on borrowed time. But he had felt a murmur in [the Force](#) during the Ossus massacre;

[someone](#), a Jedi, had somehow used the Force to heal [someone else](#), bring them back to life from the brink of death. If his reign was to endure, if he was to establish his vision of galactic order, he had to find this Jedi with the power to bring beings back to life, and bend his power to serve the dark side.

For seven years, the Sith began to impose their rule over the galaxy.

Unfortunately, unlike the last [Empire](#), they were unable to maintain complete control, for Fel had gathered [his forces](#) on [Bastion](#); there were many Jedi who weren't killed; the [Alliance Remnant](#) struck at them at every turn. Things got so out of hand that the Sith had to resort to trickery to lure out their enemies to be slaughtered. But the leaders of the three factions were not fools and refused to walk into a trap. Also the Moff Council, [Grand Admiral Morlish Veed](#), and his lover, [Nyna Calixte](#), were planning to undermine the Sith to take control of the Empire.

Krayt and Wyyrlok discuss Krayt's "condition".

Hearing word that a Skywalker had survived the massacre, Krayt ordered all his resources to search for the lost Jedi. When he arrived on Coruscant to rescue Jedi healer [Hosk Trey'lis](#), the Sith were able to catch him, and called off the search. Krayt, after torturing him into using his powers, proceeded to turn Skywalker to the dark side, so he could use his [healing power](#) to cure him. This caused a number of Sith to question their Dark Lord. But Skywalker escaped, along with a little help and Trey'lis joined the Force. Krayt ordered his minions to resume the search for Skywalker.

After [Gar Stazi](#) stole the new [Advanced Star Destroyer Imperious](#) from the [Mon Calamari Shipyards](#), Krayt [ordered 10% of its Mon Calamari population exterminated](#). His loyal Sith and [stormtroopers](#) began by [slaughtering](#) the entire [Mon Calamari Council](#), while the rest of the Mon Calamari population was forced into forced labor camps^[4]. While the [Mon Calamari Rangers](#) organized to fight against the genocide, the Sith, under the command of [Darth Azard](#), created a [Sea Leviathan](#) and unleashed it on the unsuspecting Mon Calamari.^[5]

"Death" of the dreamer [Edit](#)

"My vision...my dream...for One Sith...will live!"

"It is a magnificent vision, my Lord. Sometimes, for the dream to live...the dreamer must die."

—Darth Krayt and Darth Wyyrlok

Skywalker later lured Krayt into a trap, which would spell the Dark Lord's downfall. After [attacking](#) the Imperial base on [Had Abbadon](#), Krayt received a message from another Sith: [Karness Muur](#), an ancient Sith who had possessed the body of the Jedi [Celeste Morne](#). Muur told Krayt that he could heal Krayt and had captured Skywalker, but to travel alone. Ignoring Muur's demand, Krayt traveled to Had Abbadon with Lords Wyyrlok, [Maladi](#), [Stryfe](#), and [Talon](#). Once there, Skywalker sprang the trap, and Jedi and Imperial Knights [ambushed](#) the Sith.

Emperor Krayt was stabbed through the chest by Imperial Knight [Azlyn Rae](#), blasted with [Force lightning](#) by Morne, and then thrown off a cliff. After Wyyrlok, who had not participated in the battle, recovered the injured Sith Lords, he found Krayt still alive. He had finally discovered the information on how to heal himself, taking it from Muur. Wyyrlok, however, finished off the Emperor by blasting the wounded Krayt with more Force lightning, presumably killing the Dark Lord and ruler of the One Sith, and claiming that for Krayt's dream to succeed, he would have to die.^[6]

Darth Krayt's "death," at the hands of Darth Wyyrlok.

Wyyrlok put Krayt's (unknown to him) unconscious body in a special tomb that appeared to be a stasis chamber, located within Korriban's [Sith Temple](#). This way, Wyyrlok could appear to still be serving Krayt while in reality the Sith were now under his control. Yet, Lord Wyyrlok's plan was to bring Darth Krayt's vision for a unified galaxy to reality: every single being in the galaxy becoming a member of the One Sith^[7].

Schism [Edit](#)

"You are dead! I killed you!"

"You betrayed me Lord Wyyrlok. Of all who followed me, you were the closest."

"I behaved as any Sith would. As a Sith should—killing his master. I offer no apology."

"I would accept none."

—Darth Wyyrlok and Darth Krayt

However, despite Wyyrlok's appointed position as [Regent](#) of the Order and his new place as the *de facto* ruler of the Empire, not all were satisfied with Wyyrlok's rise to power. Darth Maladi suspected (correctly) that Wyyrlok had in fact killed the Dark Lord of the Sith and taken over for his own purposes. She shared her concerns with Darth Nihl, and convinced him to go to Korriban to corroborate whether Lord Krayt was alive or dead. After arriving at [Krayt's tomb](#), guarded by Darth Talon, both Nihl and the [Twi'lek](#) were surprised to see that Krayt's body had vanished, leaving only his empty [armor](#) behind.

At the same time, Wyyrlok also ordered the execution of the [Final Protocol](#), the extermination of all life on [Dac](#). Though the [Galactic Alliance Remnant](#) managed to save nearly twenty percent of the planet's population, Wyyrlok still considered the act of genocide a success that would keep the galaxy in line.

Meanwhile, a number of Sith Lords of the [First Sith Imperial Strikeforce](#) attacked a meeting between Roan Fel and members of the New Jedi Order on the world of [Agamar](#). In the resulting confrontation, Fel managed to flee the planet, though Princess [Marasiah Fel](#) was captured in the process.

After the disappearance of Krayt's body, Talon herself disappeared from the Temple. Darth Wyyrlok used this opportunity to frame Talon for Krayt's death and sent Darth Nihl to capture her. Nihl found her in the [Valley of the Dark Lords](#), where he also saw the resurrected Darth Krayt, who had become more powerful than he had ever been since he had successfully purged his body of the [Vong seeds](#). Krayt showed Nihl and Talon a secret chamber where he had been creating a new breed of [Sith troopers](#) that were unquestionably loyal to him. With the use of these troops, Krayt planned to end the war and impose peace and order over the galaxy. He then used his magnified powers to call out to every being in the galaxy that touched the dark side showing that he had returned. The entire One Sith once again pledged loyalty to their Master, with the exception of Darth Wyyrlok, who now stood alone as Krayt's enemy.

Following his resurrection, Krayt, along with Nihl and Talon, started to implement his plan to conquer the galaxy. Due to his newfound view on death, as he believed that it was a path to something much greater, Krayt believed that the galaxy needed to experience the pain of death before enduring rebirth so as to finally be at peace.

Krayt's first objective was to reclaim his throne and have his revenge on Darth Wyyrlok. To that end, he [led](#) Darth Nihl, Darth Talon and two of his Sith troopers into the Temple of the Sith on Coruscant. Upon learning of Krayt's rebirth, Wyyrlok had revealed his deception to the Sith but lied, claiming that Krayt had succumbed to his illness. He then proclaimed himself as their leader and numbers of Sith decided to follow him. Most, including Darth Stryfe, said that they would follow the victor as 'might decided'. Krayt and Wyyrlok [dueled](#), both proving to be extremely powerful masters of the dark side. Wyyrlok used his [sorcery](#) to try and subdue Krayt by invoking

The Schism ends with Darth Wyyrlok's death.

the painful memories of his tormented past but Krayt had mastered and overcome his weaknesses. Feigning weakness, Krayt killed Wyyrlok and reclaimed his throne both in the Sith Order and the Empire.

After his coup, Krayt launched a series of violent attacks against worlds such as [Borosk](#), [Vinsoth](#) and [Falleen](#). He also received a message from Cade Skywalker who had sworn that he would hunt Krayt down and end his reign of terror. Krayt wanted Skywalker to go through what he had been through and what he was putting the galaxy through: death and resurrection.

Post-Krayt [Edit](#)

"We will disperse into the galaxy in small numbers, masking ourselves, hiding amidst the enemy. We will infiltrate governments on every planet. All must be brought down for something new to be created. Together or alone, we will slip onto worlds and strike from the shadows. We will be invisible. We will be patient. All that exists will be torn apart from within. Darth Krayt's vision of galaxy remade will be realized. He lives in us. The Sith will prevail."

—Darth Nihl

With the death of the Sith Lord Darth Krayt at the hands of the former Jedi Cade Skywalker during the [Battle of Coruscant](#), Darth Krayt's Galactic Empire was unable to fight on without its emperor. Although his short-lived empire was lost, Krayt's Sith Order ultimately survived, albeit in a weakened and diminished state.^[8]

Cade Skywalker kills Darth Krayt, founder of the One Sith.

Upon Krayt's death, command of Sith-Imperial forces on Coruscant fell to Darth Nihl, who immediately ordered the extermination of Darth Krayt's Sith troopers. Without Krayt's power and influence to keep them in check, the Sith troopers swiftly descended into madness and began targeting everyone at random, including members of the One Sith. With the [war](#) lost and their enemies victorious, Nihl commanded all of the surviving Sith to retreat from key worlds, such as Coruscant and Korriban to escape [capture](#) or [death](#). As

the newly-formed [Galactic Federation Triumvirate](#) asserted its dominance over the entire known galaxy, the One Sith remained in hiding as per Nihl's orders, ironically finding themselves in the same position that the Jedi endured for several years—hunted and on the run. With their empire destroyed and their capabilities severely weakened, Nihl instructed his Sith followers to infiltrate every [planetary](#) government in the galaxy, the Sith would continue to wage a war for galactic dominance through stealth, patience, cunning and secrecy.^[8] However, their infiltration would ironically be exposed by a renegade Sith Lord by the name of [Darth Wredd](#) who desired to return the Sith to the Rule of Two, when he killed one of the infiltrated Sith on [Ceitia Five](#) as the start of his campaign against his fellow Sith.

Wredd's campaign appeared to destroy the One Sith, at least to the point where he was satisfied.

Organization [Edit](#)

"Alone, a Jedi is strong. But together we are stronger. This new breed of Sith see that and try to imitate it."

—[Wolf Sazen](#)

Unlike the [previous incarnation of the Sith](#) Krayt abolished the [Rule of Two](#), [Darth Bane's](#) ancient dictate commanding that there could be only two Sith at any one time—[Master](#) and [apprentice](#). Instead, there would be the [Rule of One](#)—that One being the Sith Order itself, under which there would be many Sith, all [trained](#) to follow the Dark Lord of the Sith with blind obedience, even at the cost of their own lives. Eschewing the unisex usage of Lord by the Order of Darth Bane, the One Sith restored the title of Sith Lady for its female members, such as Lady [Maladi](#), Lady [Rauder](#) or Lady [Talon](#).

Among the One Sith of both sexes, those who had proven both their power and loyalty were bestowed the title and rank of [Darth](#).

Sith Intelligence and Assassination [Edit](#)

[Sith Intelligence and Assassination](#) was an organization within the One Sith tasked with information gathering, interrogation and political assassination intended to further the goals of the Dark Lord of the Sith and strengthen its power. By the time of the [Sith–Imperial War](#) and the subsequent [insurgency](#), it was lead by Darth Maladi and counted both Sith Lords like [Darth Kruhl](#) and acolytes like [Jor Torlin](#) amongst its numbers.

Hands [Edit](#)

[Hand](#) was the name Darth Krayt gave to his personal assassins. Lord Krayt bestowed this rank only to his most loyal and deadliest followers, such as Darth Talon. Darth Nihl also held the title of Hand because Darth Talon's training was not complete when the [previous Hand](#) perished during the [Massacre at Ossus](#). After Lord Nihl was demoted, Krayt named [Darth Stryfe](#) his new Hand.

Fist [Edit](#)

[Fist](#) was the title held by the Sith Lord who served as the supreme commander of the Sith military forces. During the Sith-Imperial War, Darth Nihl held the title of Fist, but when he was given the rank of Hand, Darth Stryfe became the new Fist.

Voice/Regent [Edit](#)

The Sith Lord who held the ranks of [Voice](#) and [Regent](#) was the second in command of the One Sith, serving as advisor to the Dark Lord of the Sith and as his caretaker and mouthpiece during Lord Krayt's periods in stasis. This title was held by the line of [Chagrian](#) Sith Lords known as [Darth Wyyrlok](#). By the time of the [Second Imperial Civil War](#), there had been three Darth Wyyrloks, while the fourth in line, [Saarai](#), underwent Sith training in Korriban.

After the disappearance of Darth Krayt's body, Darth Wyyrlok promoted [Darth Nihl](#) as the new Voice so as to keep his loyalty after his self-elevation as ruler of the Sith and the Empire.

Loremaster [Edit](#)

The [Loremaster](#) was a Sith Lord who kept the number of Sith artifacts and records attained by the Order. The third Darth Wyyrlok also held this position, and was an expert in the history of the Sith and the Order's many incarnations throughout the millennia.

Inquisitor [Edit](#)

[Inquisitors](#) were Sith Lords responsible for extracting information of enemy prisoners. They employed a number of techniques, ranging from imprisonment and interrogation to torture. [Darth Havok](#) was an Inquisitor within the order.

Troopers [Edit](#)

[Sith troopers](#) were strong Force-sensitives beings, who were secretly chosen by Darth Krayt shortly after their birth and augmented through cybernetic implants in order to turn them into servants of unquestionable loyalty and obedience to Krayt and the dark side.

Behind the scenes [Edit](#)

[John Ostrander](#) has stated that *"We haven't come up with a definite number [for the Sith] but it's certainly over 1,000, probably over 10,000. [...] It's not that they outnumber [the Jedi]. They're more cohesive and they have a better power base."^[9]*
